B. Use of Estimates in the Preparation of the Financial Statement

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. SAP also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

C. Accounting Policy

Ordinary life insurance premiums are recognized as income over the premium-paying period of the related policies. Group life and accident and health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Considerations for annuity and supplementary contracts with mortality or morbidity risk are recognized as revenue when received. Funds received from deposit-type contracts, annuity and supplementary contracts without mortality or morbidity risk, are recorded as an addition to policy reserves and are not recognized as revenue. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

NOTES TO FINANCIAL STATEMENTS

(5) Information Investor Considered in Reaching Conclusion that Impairments are Not Other-Than-Temporary

Declines in the fair value of investments that are considered in the judgment of management to be other than temporary are reported as realized losses. Management evaluates, among other things, the financial position and prospects of the issuer, conditions in the issuer's industry and geographical area, liquidity of the investment, changes in the amount or timing of expected future cash flows from the investment and recent changes in the credit ratings of the issuer by a ratings agency to determine if and when a decline in the fair value of an investment below amortized cost is other than temporary. The length of time and extent to which the fair value of the investment is lower than its amortized cost, the Company's ability and intent to retain the investment to allow for anticipated recovery in the investment's fair value and whether the Company has made a decision to sell the investment are other factors also considered.

A. Derivatives Under SSAP No. 86 – Derivatives

- (1-3)
- A currency forward is an agreement to buy or sell a foreign currency, in return for U.S. dollars, at an exchange rate agreed upon today, to settle on a specific future date. All of the Company's forward contracts are traded over-the-counter, which exposes the Company to counterparty risk to the extent there are unrealized gains on open positions. To minimize counterparty risk, the Company evaluates all counterparties based on credit ratings and maintains master agreements with netting provisions and collateral requirements.
- An option is an agreement that gives the buyer the right to buy (call option) or sell (put option) a financial instrument at a specified price within a specified time period. The buyer of an option pays a premium to the seller on the settlement date. This premium is the buyer's only cash requirement and represents the maximum amount at risk. The seller (or writer) of an option receives a premium from the buyer on the settlement date. The seller settles changes in the market value daily in cash. The Company is exposed to counterparty risk with respect to any over-the-counter options and minimizes this risk by requiring collateral from counterparties in an amount equal to any unrealized gains.

NOTES TO FINANCIAL STATEMENTS

An interest rate futures contract is an agreement to buy or sell U.S. Treasury Bonds to settle on a specific future date. All of the Company's futures contracts are exchange traded which minimize counterparty risk. The Company satisfies the initial margin requirements with cash.

Interest rate swaps are used by the Company to reduce market risks from changes in interest rates and to protect against variability in future cash flows. In an interest rate swap, the Company agrees with another party to exchange, at specific intervals, the difference between fixed rate and floating rate interest amounts as calculated based upon an agreed upon notional amount.

During 2019, the Company used currency forward contracts to reduce the currency risk inherent in certain bond investments denominated in foreign currencies. The Company also used interest rate futures contracts and interest rate swaps to reduce interest rate-related risk related to certain bond investments.

Note 12 – Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

A-D. Defined Benefit Plan

During 2009 and prior, the Company sponsored a qualified non-contributory defined benefit pension plan covering substantially all employees age 21 or over with more than one year of service with the Company or its affiliates. The Company funds pension costs in accordance with the requirements of ERISA. Effective December 31, 2009, the plan was frozen and has not accepted new participants after that date. Existing participants in the plan did not accrue any additional benefits under the plan after that date.

During 2009 and prior, the Company also sponsored a supplemental executive retirement plan. The plan provided certain key employees with the opportunity for additional postemployment income, which would otherwise have been limited under the pension plan. The plan is a nonqualified tax-deferred retirement plan and is not funded. Effective December 31, 2009, the plan was frozen and has not accept new participants after that date. Existing participants in the plan did not accrue any additional benefits under the plan after that date.

In October 2018, the Board of Directors of the Company approved the termination of the pension plan. The pension plan termination consists of the process of settling all benefit obligations to plan participants.

In conjunction with the pension plan termination, in August 2019, for those pension plan participants who elected to receive their benefit in the form of monthly payments, the Company purchased a nonparticipating single premium group annuity contract from a third party insurance company. Additionally, lump sum payments to pension plan participants who elected to receive their benefit in this form were made in September 2019. The Company recognized \$11,744,217 of expenses related to the termination of the pension plan. After all of the final administrative expenses were paid, the pension plan had \$7,219,361 of excess plan assets remaining. In December 2019, the Board of Directors of the Company approved the contribution of the excess pension plan assets to the tax-deferred retirement savings plan. This contribution to the tax deferred retirement savings plan will be made in April 2020.

In addition to pension benefits, the Company provides certain health care and life insurance benefits ("postretirement benefits") for retired employees. The health care plan is non-contributory for current retirees and those employees who attained age 55 with ten years of service by December 31, 1992. Cost sharing features include deductibles and co-payment provisions. Other employees will be eligible for a dollar denominated postretirement health plan. Life insurance benefits are generally set at a fixed percentage of policy face value based on the employee's age. Employees who had not attained age 55 with ten years of service by December 31, 1992 are not eligible for any postretirement benefits. The Company funds postretirement benefit payments as claims are incurred or as premium payments are due to the insurer.

**NOTES TO FINANCIAL STATEMENTS**

The assets, benefits obligations and periodic costs related to these plans are not material to the Company's financial position or results of operation.

E. Defined Contribution Plans

The Company sponsors a qualified tax-deferred retirement savings plan for employees of the Company or its affiliates, who are at least 21 years old. In addition, the Company sponsors a nonqualified tax-deferred savings plan for certain key employees. The Company has created this plan as an additional tax-deferred savings option for highly compensated employees whose compensation exceeds the limit on the tax-deferred savings plan or whose contributions to the deferred savings plan are limited to ensure the plan's compliance with a nondiscrimination test. During the year ended December 31, 2019, the Company made matching contributions for every dollar the employee contributes under the combined plans, up to 4% of the employee's before-tax contributions. The Company's contributions to the plans were not material.

Note 20 – Fair Value Measurements

A. Fair Value Measurements

(1) Fair Value Measurements at Reporting Date

The methodologies and valuation techniques used by the Company to value those of its assets, which are measured at fair value are described below.

Instruments included in bonds include mortgage-backed and corporate securities, U.S. Treasury and other U.S. government guaranteed securities, securities issued by U.S. government-sponsored enterprises, and obligations of U.S. states, municipalities and political subdivisions. The market liquidity of each security is taken into consideration in the valuation technique used to value such security. For securities where market transactions involving identical or comparable assets generate sufficient relevant information, the Company employs a market approach to valuation. If sufficient information is not generated from market transactions involving identical or comparable assets, the Company uses an income approach to valuation. The majority of the instruments included as bonds are valued utilizing observable inputs; accordingly, they are categorized in either Level 1 or Level 2 of the fair value hierarchy described below. However, in instances where significant inputs utilized are unobservable, the securities are catergorized in Level 3 of the fair value hierarchy.

The inputs used in the valuation techniques employed by the Company are provided by nationally recognized pricing services, external investment managers and internal resources. To assess these inputs, the Company's review process includes, but is not limited to, quantitative analysis including benchmarking, initial and ongoing evaluations of methodologies used by external parties to calculate fair value, and ongoing evaluations of fair value estimates based on the Company's knowledge and monitoring of market conditions.

The levels are categorized as follows:

Level 1- Valuation is based upon quoted prices for identical assets or liabilities in active markets. Level 1 fair value is not subject to valuation adjustments or block discounts.

Level 2 - Valuation is based upon quoted prices for similar assets or liabilities in active markets or quoted prices for identical or similar instruments in markets that are not active. In addition, a company may use various valuation techniques or pricing models that use observable inputs to measure fair value.

Level 3 - Valuation is generated from techniques in which one or more of the significant inputs for valuing such assets or liabilities are not observable. These inputs may reflect the Company's best estimates of the various assumptions that market participants would use in valuing the financial assets and financial liabilities.

Other investments held at fair value primarily consist of common stock, currency forwards and purchased option contracts. For private equity investments, since quoted market prices are not available, the transaction price is used as the best estimate of fair value at inception. When evidence is believed to support a change to the carrying value from the transaction price, adjustments are made to reflect expected exit values. Ongoing reviews by Company management are based on assessments of each underlying investment, and the inputs utilized in these reviews include, among other things, the evaluation of financing and sale transactions with third parties, expected cash flows, material events and market-based information. These investments are included in Level 3 of the fair value hierarchy.

The fair values for bonds, preferred and common stocks and other invested assets have been primarily obtained from broker-dealers and from nationally recognized statistical organizations and, in the case of certain structured notes, by reference to the fair values of the underlying investments. The carrying values for loans approximate fair values because these investments are primarily either short-term in duration or have an underlying interest rate that is variable. The Company has assessed the fair value of the loans based on a representative sample and determined that any remaining difference between the fair value and carrying value of loans is not material. There are no quoted market prices available for the Company's surplus notes.

Note 35 – Separate Accounts

A. Separate Account Activity

(1) General nature of Separate Account Business

In accordance with Section 245.21 of the Illinois Insurance Code, the Company has established and maintains separate accounts for the purpose of funding variable life insurance contracts issued by the Company. Assets held in the separate accounts represent funds invested in a separately administered variable life insurance product for which the policyholder, rather than the Company, bears the investment risk. These assets had, prior to 2014, been invested in interests in a limited liability company that invests in funds that trade in various financial instruments. This limited liability company, all of whose interests are owned by one of the Company's separate accounts, utilizes the financial statements furnished by the funds to determine the values of its investments in such funds and the carrying value of each such investment, which is based on its proportionate interest in the relevant fund as of the balance sheet dates. As such, these funds' financial statements constitute the key input in the Company's valuation of its investment in this limited liability company. The Company concluded that the value calculated using the equity method of accounting with respect to its investment in this limited liability company was reflective of the fair market value of such investment.

In 2014, the Company made available to its variable life policyholders new investment options for their policies, which are effectuated through individual sub-accounts of a separate account having been newly established by the Company, and various transfers of policy cash values to these sub-accounts occurred over the course of 2014. Each of these sub-accounts relates to an investment in a designated third-party investment fund whose interests are available for purchase only by insurance companies for the purpose of funding variable life insurance and variable annuity contracts, and these funds include both private investment funds and mutual funds registered under the Investment Company Act of 1940.

(2) In accordance with the products/transactions recorded within the separate account, some assets are considered legally insulated whereas others are not legally insulated from the general account. (The legal insulation of the separate account assets prevents such assets from being generally available to satisfy claims resulting from the general account.)

As of December 31, 2019 and 2018, the Company's separate account statement included legally insulated assets of \$186,553,733 and \$163,366,352, respectively. The assets legally insulated from the general account as of December 31, 2019 are attributed to the following products/transactions:

| Product/Transaction     | Legally Insulated Assets | Separate Account Assets (Not Legally Insulated) |
|-------------------------|--------------------------|-------------------------------------------------|
| Variable Life Insurance | \$ 186,553,733           | \$                                              |
| Total                   | \$ 186,553,733           | \$                                              |

NOTES TO FINANCIAL STATEMENTS

(3) In accordance with the products/transaction recorded within the separate account, some separate account liabilities are guaranteed by the general account. (In accordance with the guarantees provided, if the investment proceeds are insufficient to cover the rate of return guaranteed for the product, the policyholder proceeds will be remitted by the general account.)

The separate account of the Company is not guaranteed by the general account and did not pay any risk charges to the general account during 2019.

(4) Securities Lending Within the Separate Account  
The separate account did not engage in any securities lending transactions during 2019.
