Pivotal Labs

Master the Pivotal way of building software

WAYS TO ENGAGE

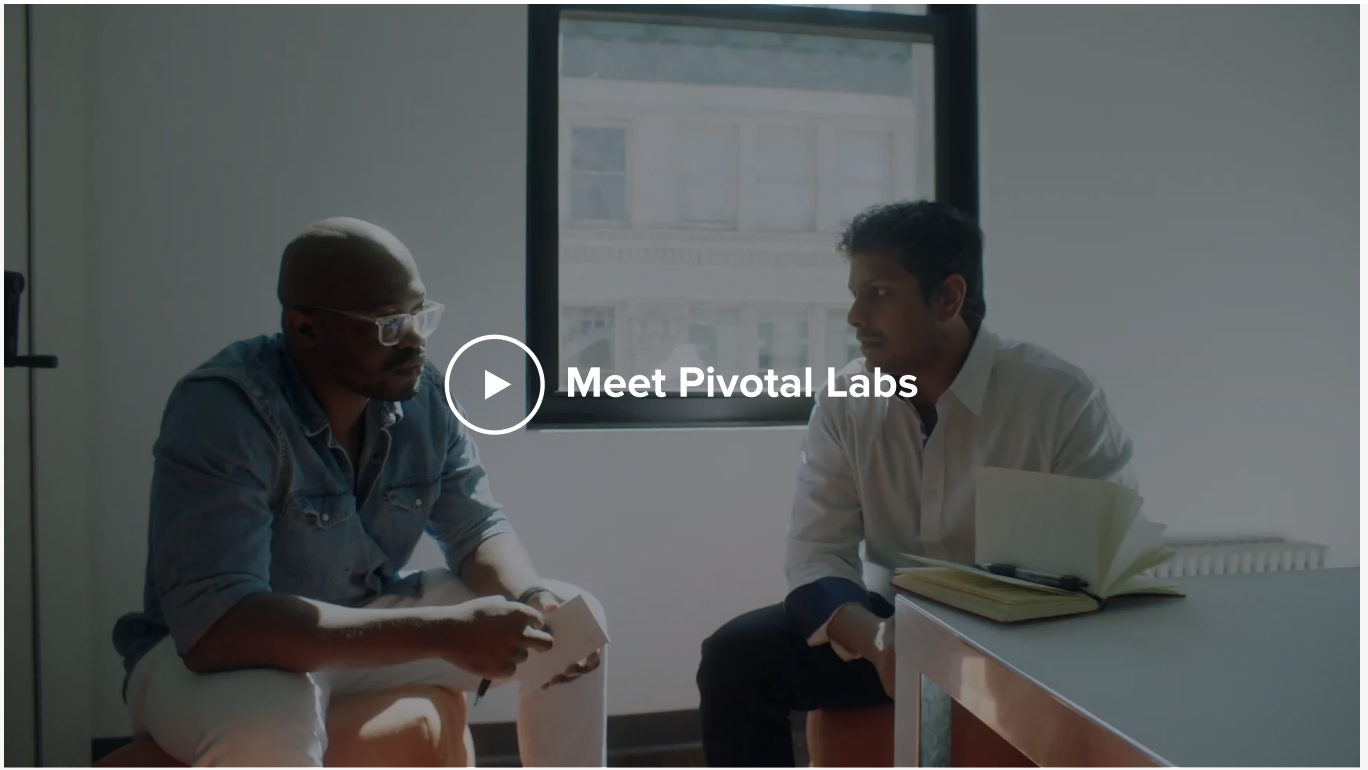

Product Development →

App Modernization →

Platform Ops →

Data Science →

Education →

We don't just drop in, deploy, and leave—we'll work side by side with your team to build capabilities and instill a process that shows immediate and lasting impact. Empower your teams to deliver the products your customers need.

Hit the ground running.

Let's work on what matters first, starting on Day 1. We'll partner with you to establish dedicated Platform Teams, assess your entire portfolio, and determine where to innovate, where to modernize, and how to excel at both.

Make a habit of best practices.

Learn by doing. Immerse your teams in the modern methodologies and technologies that help deliver the products customers want. So when you encounter similar problems in the future, you'll have the tools and mindset to fix them.

Solve your toughest challenges with Pivotal Labs

Some problems require more than tools. Engage with Pivotal Labs to start building the right thing for your users—and get it into production quickly.

Product Development

“We need to build products our users will love.”

COMMON CHALLENGES

- ⊖ Our innovation has slowed, and startups are winning market share.
- ⊖ Our teams are focused on project tasks, not product backlogs.
- ⊖ Our teams aren't releasing software fast enough.
- ⊖ Our teams aren't certain they're building the right products for users.

HOW WE CAN HELP

Build the right thing the first time. You'll learn how to use agile development to deliver the products your customers desire. Refocus your teams around a new mindset and processes that quickly validate your concepts and get them from idea to production in days, not months.

App Modernization

“We need to modernize our apps for the cloud.”

COMMON CHALLENGES

- ⊖ Our applications have monolithic architectures that hinder velocity.
- ⊖ We need to update our apps to take advantage of cloud elasticity.
- ⊖ Our legacy apps are driving up tech debt and operations costs.

HOW WE CAN HELP

Go beyond lift and shift. We can help you quickly assess business-critical applications so you can start migrating legacy software immediately. Make the applications that matter more reliable, accessible, and scalable.

Platform Ops

“We need a well-run platform that supports our developers.”

COMMON CHALLENGES

- ⊖ We want to spur developer productivity using Pivotal Platform.

- ⊖ Our operational burden is skyrocketing, and we can't apply security patches fast enough.
- ⊖ We need to scale usage of the platform to dozens of teams, not just a few early adopters.

HOW WE CAN HELP

Run your platform at scale and make life better for your developers. Learn the new rules of cloud ops so you can ramp up your success with Pivotal Platform. Create a dedicated team that runs the platform like a product that continually evolves to meet the needs of your business.

Data Science

Use data to drive your products—and your business

Tackle the toughest business challenges using modern, agile data science practices. And create the futureproof new apps your users crave.

[Data Science](#)

Education

Develop new skills and validate your progress

Learn new ways of thinking that build up your cloud-native skills. Your teams will thrive and in turn, so will your business.

Education

“Pivotal has proven to be a place where large enterprises can learn lean startup principles, and use them to build disruptive software products.”

ERIC RIES, AUTHOR OF *THE LEAN STARTUP*
