PAT. NO.	Title
1 10,277,394	System and method for accessing information resources using cryptographic authorization permits
2 9,916,175	Multi-session zero client device and network for transporting separated flows to device sessions via virtual nodes
3 8,887,131	Optimized code generation by eliminating unused virtual function
4 8,868,928	System and method that uses cryptographic certificates to define groups of entities
5 8,689,244	Hardware communications infrastructure supporting location transparency and dynamic partial reconfiguration
6 8,677,378	Lightweight, high performance, remote reconfigurable communications terminal architecture
7 8,443,191	System and method for accessing information resources using cryptographic authorization permits
8 8,380,981	System and method that uses cryptographic certificates to define groups of entities
9 8,045,462	Partitioning communication system
10 7,474,618	Partitioning communication system
11 7,424,549	System, method, and article of manufacture for using a replaceable component to select a replaceable quality of service capable network communication channel component
