Facilities

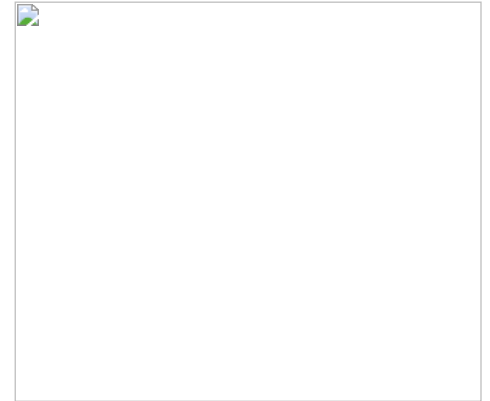

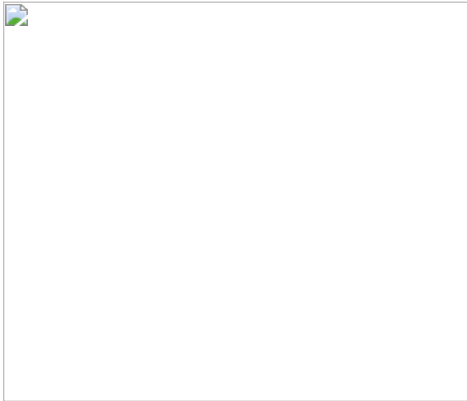

Commodore Point

**2060 East Adams St.
Jacksonville, FL 32202**

- Between the Matthews Bridge and the Hart Bridge
- East of TIAA Bank Field
- Located on the St. Johns River

The main office and facility is located at Commodore Point. It has approximately 3800' of bulk-headed wharf, 210,000 square feet of warehouse and shops, and resides on approximately 25 acres of property. North Florida Shipyards Commodore Point facility has been in the ship repair, conversion and modernization business since its inception in 1978. Our Commodore Point Facility has been providing commercial ship repair and modernization support to numerous customers for 30 plus years. This facility houses all elements for successful vessel repairs from start to finish: Estimating, Production Management, Fabrication, Pipe, Electrical, Outside Machine, Dry-Docking, and complete logistics services.

The NFSY Commodore Point Facility places top-level priority on continually improving our support to customers who build, operate, maintain, and modernize ships. Our Commodore Point facility provides customers with a well-balanced, talented, and experienced team focused on quality performance. A spirit of innovation and responsiveness to customer concerns are the key traits of each person, on every task.

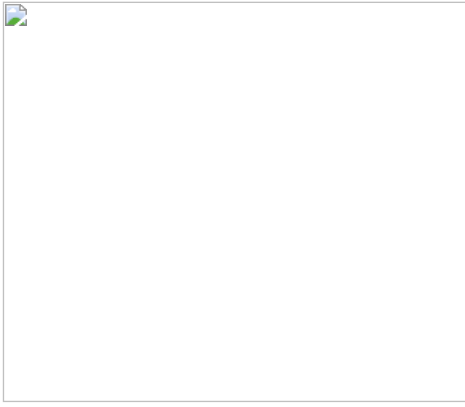

Naval Station Mayport

**1933 Bailey Ave.
Jacksonville, FL 32228**

- Located in Naval Station Mayport
- Direct access to the Atlantic Ocean

Our facility located in Naval Station Mayport is situated on 2.5 acres and is comprised of a 60,000 square foot industrial building that houses our fabrication shop, pipe shop, machine shop, electric shop, crane and rigging shop, material storage warehouse, paint shop, and the administration department. We are designated with the MSRA certification. NFSY's Quality Assurance program is ISO 9001; 2002 compliant, second party certified by the US Government. All welders are certified to ABS, DNV, and US Navy standards as required. Our team is dedicated to providing expert service and results.
