Manufacturer of Supreme Protector® Fabrics & Thread

[Home](#) | [Fabric & Thread](#) | [Storm-A-Rest](#) | [Tactical Body Armor](#)

**Manufacturers of  
 Patented Supreme® Protector High Performance Fabrics,  
 Supreme Protector High Performance Threads and  
 Performance Guaranteed Products Made From Supreme Protector Materials**

Storm-A-Rest Window & Door Hurricane Protection Panels, mailsail luff tape, combat proven body armor, ballistic vests, steel and ceramic plates, tactical load bearing gear, stab resistant aprons, marine sentinels, two-year guaranteed covers for USN USCG USMC USA USAF small boats, cannons, machine guns, cargo aviation equipment and naval deck gear including pumps, pump cans, ready service lockers, winches, capstans, fire stations, fuel pits, rescue craft, scramble nets, electronics, RADAR arrays, towed arrays and sling covers.

JHRG also produces performance guaranteed chafe protection for salvage and rescue divers ropes and umbilicals; antichafe gear for ships and barges; sawyers KickBack aprons; and custom crafted textiles for industrial, military and consumer applications.

Lightweight Storm-A-Rest Window & Door Shutters feature Sunbrella(reg.) accent trim and WD/Zip(tm) technology for upper story deployment.

Storm-A-Rest Hurricane Panels transmit 76% of outdoor light into your home. Storm-A-Rest panels are light weight AND light transmitting.

Waterproof Supreme Protector thread affords 100% wet strength and resistance to common shipboard chemicals, solvents, lubricants, hydraulic fluid, extreme cold... more.

The development of Supreme Protector high performance fabrics and thread was drawn from years of experience in designing and manufacturing combat-proven body armor. Applications for extraordinary textile designs made from Supreme Protector materials now include: military and commercial aviation products; high-performance chafing gear for barges, ships and recreational vessels; scores of undersea requirements for durable fabrics and thread; Storm-A-Rest Hurricane Protection Panels; on-deck covers for ships' equipment and personal protective gear for many industrial applications.

Lightweight fabric does not mean low strength. Supreme Protector fabrics and thread are many time stronger than steel, aluminum and other commercially available textiles.
