

Safe – Reliable - Experienced

OUR SERVICE CAPABILITY STATEMENT

About RANS

Why Choose RANS?

History and Background

RANS (Robert And Nancy Sevior) Electrical has been a family owned and operated private Australian company since its commencement of operations in 1956 as R&B Electrical. In the 70's it changed to R&N Sevior Electrical Contractors and in the late 90's it adopted its current trading name RANS Electrical.

Robert, the son of Robert & Nancy Sevior, and his wife Angela continue to proudly own and operate the business and uphold the values, culture and work ethic that was established by Robert's parents many years before.

During the last 60 years the company has continually evolved and considerably expanded into a multi-skilled organisation that is highly regarded in the industry today as the premier provider of both High Voltage and Low Voltage Electrical Contracting services.

Our Expertise

RANS Electrical is known in the Industry for its depth of experience and strong safety record. Our High Voltage and Low Voltage expertise has consistently delivered some of Victoria's largest projects. Our highly trained High Voltage electricians, cable jointer & engineers are experts in their field and service the private network and public utilities networks

Some of our HV Services:

- Maintenance services

Our Values

At RANS Electrical we firmly believe our greatest asset are the 40 plus strong permanent employees that consistently deliver against our brand promise.

SAFE – RELIABLE – EXPERIENCED

- Safety First – Zero Harm Culture
- Deliver quality – no short cuts
- Honesty & Integrity
- Customer – they are our focus
- Respect – internal and external stakeholders
- Punctual
- Commitment

At RANS Electrical customers return to us not just because we have delivered against the brief but because we are responsive, collaborative, honest, safe and perform in a professional manner. We are very selective in who makes the grade to be part of the RANS Electrical team.

What Makes us Unique

Our Team is multi-skilled. They are all A Grade licensed but may also hold an Adv Diploma ESI, Cert III Cable Jointer, Mech Engineer or Cert IV Instrumentation. They can facilitate multiple functions eg: terminate/Joint and Cable test when in contrast our competitors need to call in an individual with that particular set of skills to complete the job.

All our HV Electricians are VESI qualified. Our LV Electricians are highly trained in the industrial sector. RANS has one of the largest inventory of specialised tools & HV LV technical test equipment in Victoria.

Safety Culture

When working with electricity, there are no second chances. At RANS Electrical, we make certain safety is the cornerstone of every job we do.

Our organisation recognises that safety is everybody's responsibility. That's why at RANS Electrical we actively promote and enforce a risk-free working environment that is safe from accidents and injuries. To maintain a safe working environment, we provide all staff with safety training and support that follows clear policies and procedures on every job site.

Safety isn't just about saying the right words and ticking the policy boxes, it's about fostering a culture of safety into the core of everything we do. At RANS Electrical, our staff know that if they believe a situation is unsafe, they can report it and corrective action will immediately be taken.

By choosing RANS Electrical, all work undertaken will be of the highest safety standards.

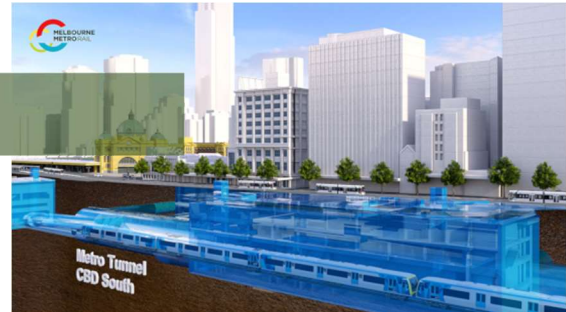

Safety System complies to AS4801:2001
