# Top 50 Electronics Distributors 2024 - Direct Components

May 17, 2024

Direct Components is your trusted, strategic partner for sourcing high-quality, hard-to-find, and obsolete parts.

At Direct Components, excellence meets efficiency. We've built solid supplier relationships throughout the globe over the past 26 years. We find parts that most others simply cannot. Leveraging a qualified team with state-of-the-art technology and holding ISO certifications among others, Direct Components ensures only the highest quality parts are distributed to customers.

We go beyond traditional distributors, as demonstrated by one of our many recent service partnerships with OEMs, CMs, EMS companies, and distributors: when a crucial part is needed for groundbreaking technology to hit the market before competitors, we deliver where others may not. We find the parts you need when you need them the most.

Our core values are DIRECT – dependability, integrity, respect, excellence, commitment, and teamwork. We value personalized customer relationships where we share our knowledge, experience, and plethora of resources to proactively solve complex problems. In addition to this, our Parts for a Purpose mission donates 5% of all sales to the Nursey Foundation, a nonprofit supporting underserved community initiatives.

With our vast network of suppliers and cutting-edge technology, we ensure fast delivery and competitive pricing without compromising quality. Whether you're in need of aerospace/defense, medical, or industrial/commercial electronics, trust Direct Components to be your reliable partner for all your component needs. Elevate your projects with Direct Components.

### **Why choose Direct Components?**

- 1 million+ components in-house
- Personalized, proactive partnerships with clients, providing market intelligence resources
- Solid and expansive global network of vetted suppliers
- Specializing in hard-to-find and obsolete parts
- Access to topline manufacturers like Texas Instruments, NXP, ST Micro, and Altera
- ISO9001, ANSI/ESD and AS9120 certified
