

About Us

We are an international technology company and a family business, which enables green transition, reliable and safe supply of electricity by creating sustainable solutions for electricity distribution.

Sustainable Solutions for Electricity Distribution

Our target is to help our customers to build and improve their distribution networks and meet the surrounding challenges. Global warming, growing urbanization, extreme weather conditions, and increased electrification demand smarter and more resilient electrical infrastructures.

Our innovative solutions adapt to these challenges, providing sustainable, long-term answers.
